CONGESTED DISTRICTS BOARD FOR IRELAND.

TO HIS EXCELLENCY WILLIAM HUMBLE,
EARL OF DUDLEY,

&c., &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

We, the members of the Congested Districts Board for Ireland, beg leave to submit this Report of our proceedings during the financial year ended 31st March, 1905.

MONEYS FOR THE PURPOSES OF THE BOARD.

Our available funds in the past year amounted to £238,846, Income and Expenditure.
derived from the following sources:—

(a) <i>Fixed Income.</i>	£
Interest on Church Surplus Grant, ...	41,250
Parliamentary Grant, ...	25,000
Ireland Development Grant, ...	20,000
Total, ...	<u>£86,250</u>
(b) <i>Fluctuating.</i>	
Repayment of Loans, ...	£9,457
Interest on Stock, &c., ...	383
Rents and repayments under various heads, ...	123,271
Loans by Board of Works for improvement of estates, ...	12,000
Total Receipts, ...	<u>£231,361</u>
Balance from last year, ...	7,485
Grand Total, ...	<u>£238,846</u>

The total expenditure as detailed in the Appendices to this Report was £229,065, which left a balance of £9,781 at the end of the year. A Table given at p. 63 shows, for each year since the formation of our Board, the gross receipts and expenditure, including all moneys which passed through our hands for the purchase of estates.

The net expenditure under the three heads specially provided for by the Treasury when the Parliamentary Grant was increased to £25,000 (see page 6 of our Report for 1899-1900) was for the past year :—

	£
Administration, ...	30,504
Technical Instruction, ...	11,686
Improvement of Estates, ...	16,499
	£58,689

Advances for
Purchases of
Estates.

The following advances were made in cash to the Land Judge by the Land Commission under Section 77 of the Irish Land Act, 1903, in payment for estates for which our offers had been accepted, between 1st April, 1904, and 31st March, 1905 :—

	£
O'Kelly (Cooloo) Estate, ...	13,000
P. M. Leonard Estate, ...	11,250
D. J. Burke Estate, ...	4,273
Taaffe Estate, ...	29,300
	£57,823

The only advance which, up to 31st March last, had been made under the 72nd Section of the Act of 1903, for the purchase of an estate for which we had negotiated with the owner, outside the Land Judges Court, was the sum of £16,037 for the Fallon Estate, in the County of Galway. We had, however, before the termination of the financial year, lodged Originating Requests under the Statutory Rules of 25th March, 1904, for advances for twenty-eight estates, at prices amounting in all to £370,671, excluding the Fallon Estate just mentioned.

It may be necessary for us to explain that since the Act of 1903 came into force no advances made through the Land Commission for the purchase of estates, or for redemption of charges on estates, pass through our accounts, the money being distributed either by the Land Commission or by the Land Judge's Court.

Treasury
Rules, Land
Act, 1903.

On the 20th February of the present year the financial rules prepared by the Lords Commissioners of the Treasury, under the 41st Section of the Act of 1903, were provisionally issued, and we reprint the Congested Districts part in Appendix No. XXIV. The rules chiefly affecting our transactions are :—

Rule 14, which prescribes the manner in which the old and new annuities shall be amalgamated in cases where we have arranged to sell additional land to enlarge the holding of a tenant who has already purchased a holding under the Land Acts.

Rules 26 and 28.—These rules provide that we may close our account with the Land Commission after the sale of each estate, and if the sale price exceeds our debt to the Commission

we shall receive the balance in cash. These rules also enable us, if the estate had been purchased by means of an issue of Guaranteed Land Stock, under the Act of 1896, to purchase sufficient stock in the market to redeem the stock which we owe to the Land Commission, and we are then entitled to receive cash for the price at which we are re-selling the estate.

Treasury
Bates, Land
Act, 1903.

OPERATIONS DURING THE YEAR 1904-1905.

Our operations fall under the following heads:—

- I. Improvement and enlargement of holdings and Migration;
- II. Sea Fisheries;
- III. Industries;
- IV. Engineering Works and Parish Committees.
- V. Miscellaneous.

I.—IMPROVEMENT and ENLARGEMENT of HOLDINGS and MIGRATION.

The Congested Districts Board was created in 1891 and from that year until November, 1903, when the Irish Land Act of 1903 came into operation we purchased estates containing 171,356 acres for prices amounting to £469,016. Since November, 1903, we have purchased under the recent Act estates containing 226,409 acres for prices amounting to £1,106,833. During these two years, therefore, our purchase operations have greatly exceeded the aggregate of our operations during the preceding twelve years.

We have deducted from the purchases made last year the Goodbody Estate, in County Galway, as we consented to allow the Department of Agriculture to take over our contract and complete the purchase of this estate on behalf of the Department, which had been for some time looking for a farm in a central position in the Province of Connaught, at some convenient railway point, for the purpose of establishing an Agricultural Station for their operations in that part of the country. As the estate had not been vested in us, no advance for the purchase had been made to us under the Land Acts.

[TABLE.

Since the date of our last Report, we have arranged terms for the purchase of the following properties:—

Name of Estate.	County.	Area tenanted.	Area untenanted or let temporarily.	Purchase Price.

As nearly fourteen years have elapsed since the establishment of our Board, and we are now for the first time in a position to report the resale of a considerable number of estates, this appears to be a suitable occasion for recapitulating briefly the successive steps by which we have been endowed by statute with the powers we now possess for the purchase and resale of land.

The Purchase of Land Act, 1891, under which the Congested Districts Board was constituted, and the "Congested Districts" Board's Powers, &c. 1891. this being the interest on the sum of £1,500,000 allocated for the purposes of the Board out of the Irish Church surplus, but although the general powers given to us by this Act were very wide, and although the Act indicated the enlargement of holdings, on the estates of private owners, as one of the objects to which we were to direct our attention, the purchase of estates, in order to carry out this object, was not suggested, and we could only hold land in the name of the Land Commission. The provisions of the Act of 1891 for the amalgamation of small holdings on private estates have been entirely inoperative, but in March, 1893, we purchased the French Estate, of 1,420 acres in Co. Galway, for £7,600, provided out of our own funds. The Congested Districts Board Act of 1893, passed a few months later, gave us power to acquire land for the enlargement of holdings, and to hold it in the names of two trustees to be appointed for the purpose. This arrangement still continues. 1893.

Another Congested Districts Board Act was passed in 1894 to enable us when selling an estate to the tenants to give a guarantee to the Land Commission for the regular payment of instalments by the purchasing tenants. It was provided that on our giving this guarantee no "guarantee deposit" would be retained by the Land Commission out of the purchase-money coming to us as Vendors of the estate. The Act of 1894 also incorporated with the Congested Districts Board Acts the provisions of the "Lands Clauses Acts" so far as they relate to taking land by agreement. 1894.

In March, 1895, two years after we had purchased the French Estate, which had been resold, we bought the estate of Clare

Board's
Powers, &c.

Island, Co. Mayo, containing 3,949 acres for £5,472, and in August, 1896, we bought the Leonard Estate, near Carna, Co. Galway, of 1,321 acres for £5,735.

It should be noted that the three estates purchased up to this time were paid for out of our own income, and that we could not, during the first five years of our Board's existence, obtain advances from the State for the purchase of land. Our operations were consequently on a very limited scale.

1896.

The system of making advances to enable us to buy estates commenced in 1896 under the Land Law Act of that year. These advances were to be in Guaranteed Land Stock, and were subject to an annuity of 4 per cent., consisting of interest at 2½ per cent., and sinking fund 1½ per cent.

On our selling an estate to the tenants through the Land Commission we were subject to a very serious restriction, as section 43, sub-section 6 of the Act of 1896 provided that the Land Commission should not make an advance to enable the tenant of a holding of a rateable value lower than £10 to purchase that holding from us. As a very large proportion of the holdings in the Congested Districts were "small holdings," and we could not obtain sufficient untenanted land to bring them all up to the £10 standard, it followed that we could not expect to re-sell much land through the Land Commission, and would have to retain the occupiers as tenants or as tenant-purchasers paying us an annuity. This disability was removed three years later by the Act of 1899. Under Section 40 (2) of the Act of 1896 a temporary tenant on an estate for sale in the Land Judges' Court had the right to buy his holding, and consequently to prevent us from obtaining the untenanted land, without which we could not enlarge the small holdings, and we would therefore have no object in buying the estate.

Although our powers for purchasing estates to enlarge holdings were for the first time placed on a fairly satisfactory basis by the financial provisions of this Act, we were still hampered by the insufficiency of our income, which did not admit of our making much outlay for the improvement of the estates purchased. The fact that we were at this time (and up to the year 1903) making a large annual expenditure for the improvement of agriculture throughout the congested districts, must also be taken into account when measuring the adequacy of our income for the wider field of operations opened up to us by the Land Act of 1896.

Another disadvantage under which we laboured was that we had to provide the capital for the redemption of head-rents, tithes, &c., on estates we purchased subject to such charges.

1899.

The Congested Districts Board Act of 1899 removed some of the disadvantages under which we had been left by the Act of 1896. It suspended the operation of the 40th section of that Act on our making an offer to purchase an estate in the Land Judge's Court, and thus prevented a "Court tenant" purchasing grass lands which we desired to acquire, until our offer had been considered; it enabled the Land Commission to make advances

for the redemption of head-rents, &c.; it removed the barrier ^{Board's Powers, &c.} which had been placed against the sale of small holdings, and it increased our Parliamentary Grant from £6,500 to £25,000; but as the Lorde Commissioners of the Treasury thereupon required us to pay the whole cost of postage, telegrams, printing, stationery, and office maintenance, in aid of which charges we had hitherto received assistance from the Parliamentary votes to the extent of about £2,800 a year, our income was practically increased by only £15,700 by the Act of 1899.

The next Act passed to facilitate our operations was the Congested Districts Board Act, 1901. Section 1 of this Act gave us power to deal with a tenant who obstructed our plans for the re-arrangement of holdings on an estate we had purchased, and gave the tenant a right of appeal to the County Court Judge. We have not yet had occasion to exercise this power. Section 2 gave us the right to enter on a holding not subject to a judicial rent, in order to arrange for the cutting of turf, &c. This provision was necessary to enable us to overcome serious difficulties experienced in the apportionment of turbary and the construction of estate roads. Section 3 of the Act of 1901 practically enlarged the boundaries of the congested districts by enabling us to have specially scheduled as congested any land purchased by us outside the congested districts as defined by the Act of 1891.

The Purchase of Land Act, 1901, extended the limits placed in the Act of 1896 on the total amount that could be advanced by the Land Commission for the purchase of estates in each county.

The Purchase of Land Act, No. 2, of 1901, deals with the annuity payable on a holding to which land has been added.

This brings us up to the Irish Land Act of 1903, which reverted to cash advances instead of Guaranteed Land Stock; gave a bonus of 12 per cent. to facilitate negotiations for the sale of estates; enabled a vendor to obtain an advance for the repurchase of his demesne, when selling his estate to the Estates Commissioners or to the Congested Districts Board; placed a limit on the amount that may be advanced for the purchase of a large holding under a "Court letting" in the Land Judge's Court; increased the maximum amount of advances to be made in each county; reduced the annuity payable by a tenant-purchaser to $3\frac{1}{2}$ per cent. for $68\frac{1}{2}$ years at a uniform rate, instead of 4 per cent. with reductions at the end of each of the first three decades, as hitherto; enabled us to settle our account with the Land Commission after the sale of each estate; facilitated the re-sale of holdings to our tenants; and added £20,000 to our income from the Parliamentary Votes.

Estates purchased prior to the Land Act, 1903.

As our procedure, financial and otherwise, in connection with the purchase and re-sale of estates has been in many important respects altered under the provisions of the Land Act of 1903, we give in this Report a statement of the results of our operations in dealing with all estates purchased previous to the date on which that Act came into force.

Re-sale of
Estates.

Under the Act of 1903 the cash necessary to pay for estates purchased by us is advanced by the Land Commissioners, and the purchase money is distributed by them. For our purchases under the previous Acts we received Guaranteed Land Stock from the Land Commission, which we had to convert into cash at the current market rate in order to pay the cash price agreed upon with vendors, and as the Stock has been at a discount since 1900 we incurred a considerable loss in providing the purchase money of many of our estates. Some of our largest purchases, however, were effected when Land Stock was selling at a premium, and on this we made a profit which more than covered our losses.

Up to the time the Land Act of 1903 came into operation we had purchased forty-six estates, comprising 171,356 acres, for £469,016. Two other estates (Mitchell No. 2, all untenanted, and Hunter's, partly untenanted), purchased for £13,890, have to be paid for under the Act of 1903, but as the untenanted lands upon them have been or are mainly to be sold as enlargements of the holdings on adjoining estates purchased previous to the Act of 1903, these two estates have been amalgamated with the older ones and included in the general statement of results of the sale of estates purchased before the Act of 1903. We also paid £1,126 for the tenant-right of three farms having an area of 649 acres and Poor Law valuation of £150 on the O'Donel Estate, Newport, County Mayo, of which we have not yet acquired the fee-simple, and which we exclude from the totals now dealt with.

The total cost of all these estates, including the price paid for the redemption of head rents, tithe rent charges, &c., and for tenant-right of land surrendered to us by occupying tenants, was £597,925. There were 6,628 tenancies on these estates at the time of purchase. Some of the tenants had two or more holdings which were amalgamated by us before re-sale.

The Poor Law valuation of all the above estates at time of purchase was £35,436. The rental of the tenanted portion was £31,587, and the estimated fair letting value of the 10,863 acres of untenanted lands thereon was £5,466. The purchase price above-mentioned includes the occupation interest as well as the fee simple of the untenanted lands purchased from landlords, and £26,389 paid to occupying tenants for their interest in farms they surrendered.

The purchase money of these estates, including the cost of 15,310 acres of untenanted land (of which 4,447 acres were bog and mountain) obtained from owners and occupying tenants, works out at an average of 16·8 years' purchase of the Poor Law Valuation.

On the 31st March, 1905, 35 of these estates had been sold or were ready for sale at prices amounting to £590,062, excluding plantations, &c., valued at £2,740, to be retained by the Board, and sale agreements in respect thereof were signed by 5,495 tenants. Thirteen estates were being prepared for sale at that date, or were not dealt with pending amalgamation with estates or

untenanted land purchased under the Act of 1903. The estimated value of these 13 estates, on the 31st March, 1905, taking into account the expenditure made upon them to that date, is £62,393. Five of them were value for £47,500, and the remaining eight, which are very small estates or farms, for £14,893. Re-sale of Estates.

On the estates above referred to, which were sold or partly sold on the 31st March, 1905, an expenditure of £9,559 is provided for in current year and has been charged against these estates, in addition to the amount actually expended to the 31st March, 1905. The remaining 13 estates of which no portion was sold on the 31st March, 1905, are put down in the statement of account at their estimated actual value on the 31st March, 1905.

In addition to the cost price of the estates as set out above, exclusive of the O'Donel Estate farms, we have expended upon them the following sums:—

	£
Improvement Works, including drainage, fencing, strip- ing, road-making, building, etc., ...	158,513
Cost of Surveys, ...	9,413
Annual Charges pending sales, head rents, rates, and purchase of cattle, etc., for grazing lands in hands not stocked by stock-owners in the neighbourhood of the lands, ...	32,130
Miscellaneous Expenditure, including refund of sums paid for the occupation-interest of untenanted land, as explained in our last Report (page 16), ...	15,014
Total, ...	215,079

The large expenditure on improvement works, representing nearly one-third of the cost of the estates, was partly provided for out of the revenue derived from rents and the receipts from lands in hands and partly from our fixed income. Portion, however (£56,335) had to be borrowed at 3½ and 3¼ per cent. interest from Commissioners of Public Works. The interest on the amount so borrowed has been charged to the estates, and also interest at 2½ per cent. on the capital advanced by the Land Commission for purchase of estates and redemption of charges. The total amount of interest chargeable against the estates in this way is £60,948 on the capital outlay for purchase and improvement. No charge has been made for interest on money provided for estate operations out of our own income. (See Appendices XXV. and XXVIII.)

	£
Purchase Money, ...	597,925
Improvements, cattle purchased, etc. (as above), ...	215,079
Interest on Capital, ...	60,948
	873,952
Adjustments for lands transferred, to be sold with other estates, deduct, ...	878
Total Outlay, ...	£873,074

Re-sale of
Estates.

The receipts and repayments made, or to be made, are as follows :—

	£
Estimated proceeds of sale of estates, ...	655,195
Total sums received from permanent tenants for rent, or interest on sale-price of holdings, ...	128,428
Receipts for cattle sold, grazing-rents and sale of meadows and timber on land in hands, ...	36,660
Sums received from tenants for occupation-interest of additional land given to them, ...	11,639
Miscellaneous Receipts, and stores in hands, ...	7,126
Total Repayments, ...	£839,038

The gross totals are :—

	£
Total Outlay, ...	873,074
Total Re-payments, ...	839,038
Not Loss, ...	£34,036

This loss represents $5\frac{1}{2}$ per cent. on the total purchase money of the estates, including the redemption of Head rents or other charges, but exclusive of cost of improvements or other outlay. All Administration and Establishment charges are excluded, being provided for by the fixed income we receive from the Parliamentary Votes, &c.

We consider these financial results satisfactory, especially in view of the facts that these estates for which we paid £597,925, and upon which we expended £158,513 mainly in wages to the tenants and their families, for drainage, fencing, road-making, buildings, and other improvements, are being sold to the tenants in their improved condition, at a loss of only £34,036 to our funds. The sale price includes the tenant-right value of parcels of land added to existing holdings, and additions made to sale price of holdings in repayment of assistance given to tenants for the erection of dwelling-houses.

A considerable proportion of the outlay on improvement works was of a highly reproductive character, notably our expenditure of £22,731 on main drainage, which we carried out on every estate needing it, except where we were unable to procure sufficient outfall, by reason of the objections of adjoining proprietors, or where the main watercourses into which those from our estates discharged, were in such a bad condition for long distances through adjoining properties, that we could not undertake the expense necessary for the improvement of them.

On the Dillon Estate alone we expended £13,651 on main drainage, efficiently draining some thousands of acres of land and bog, formerly almost valueless because of frequent flooding, or so water-logged that it could not be cultivated or otherwise improved. We did not make drains for the sole benefit of any individual tenant, but confined our operations to the main drainage system of the estate or district, thus providing an outfall for the drainage of the holdings affected. We are pleased to be able to

state that the great majority of the occupiers have already taken advantage of the facilities thus afforded them to drain and improve their land by making the necessary drains on their own holdings. Re-sale of Estates.

Altogether over 300 miles of main drains and larger water courses have been made, deepened, or improved. Extensive areas of swampy land on the Dillon Estate are now thoroughly drained, and in the course of a few years will be of considerable agricultural value.

With the object of giving an accurate idea of the nature of these drainage operations we append a map which shows the line of the improved water-courses of the Dalgan river and its tributaries for 21 miles on the Dillon Estate. The area of land drained by it is coloured blue. This work cost £1,837, and the area drained was 2,205 acres, of which 375 acres were bog, previously worthless, and are now good turf. In a similar way 13 miles of the Trimogue river and its tributaries were improved from Cuiltybo to Carrowbeg and from Rinn to Caher, Lurgan and Doogary, at a total cost of £1,528, the area drained being about 1,200 acres. (See Appendix XXX.)

Several miles of the tributaries of the Lung River were also improved, but as extensive works are in progress on the main river an account will be given of the entire work in our next report. A considerable area of these lands along the river banks and marshy flats which used to be flooded for most of the year are now yielding good pasture and meadow.

We have also made a large drainage cut through the Waldron Estate, to provide for the partial diversion of the River Lung, which floods an extensive area of country between Ballaghadereen, Crenane, Aughadristan, Lisacull, Errit, and Orlaur, for a distance of about 20 miles along its course and 10 miles of its tributaries. The drainage of this river affects so large an extent of land, and will be a work of such a highly reproductive character, that we have decided to expend a considerable sum upon it during this year, charging the greater part of the outlay to the Dillon and other estates concerned.

Our expenditure in connection with the erection or improvement of dwelling-houses, and the erection of out-offices on all our estates, amounts to £65,608 up to the 31st March, 1905. Of this £24,725 represents our outlay in respect of the erection of houses and out-offices on rearranged holdings and new buildings provided for migrants, and the remainder was given to the tenants in cash, or in value of materials from our stores, under the terms of the house improvement schemes referred to in our previous reports, which we put into operation to assist the tenants in the erection of out-offices, and the improvement of their dwelling-houses.

The greater part of this expenditure is covered by the increased sale price of the holdings on which the buildings were erected, or by a loan to be repaid in half-yearly instalments. Our contributions towards these buildings were given in the form of a free

grant of £5 for the building of a new dwelling-house with a thatched roof, or £7 10s. with slated roof. Free grants, usually not exceeding £3 were also given for the erection of a suitable out-office with corrugated iron roof. We have not, except in a few special cases, erected a building for any landholder, unless we were obliged to do so when re-stripping holdings, or preparing new holdings for migrants.

Our procedure in these matters is based on the policy of encouraging self-help, and we have much satisfaction in stating that this policy is becoming more successful every year, and that we now find a large proportion of the people anxious to avail of any assistance we offer to enable them to improve their houses and surroundings. In many cases the people have carried out substantial improvements without assistance.

Up to the 31st March, 1905, we had only built 155 dwelling-houses and 179 out-offices, while under our various Estate Improvement Schemes, and the Parish Committee Schemes in operation throughout the congested districts the landholders, with some assistance from us, built and improved 3,861 dwelling-houses, and erected 6,714 out-offices.

Returns have been prepared for most of the estates purchased by us, giving particulars of the live stock, fowl, &c., kept on each holding, and also particulars as to each tenant's family. A summary of the information so collected in respect of 3,847 holdings on portion of the Dillon Estate, the rental of which was £15,102, is given in Appendix XXVII. It will be observed that the holdings referred to in this return paid, on an average, £3 18s. 6d. per year rent, and they may be taken as fairly typical holdings in the Swinford Union, which is the most densely populated of the congested districts, and is the district which supplies the largest number of migratory labourers. The return shows that out of a total of 3,847 holdings, 1,096 of the tenants or heads of families were migratory labourers, spending, on an average, 5½ months of the year in England, and that in addition 2,401 other members of the tenants' families were also migratory labourers, making a total of 3,497 migratory labourers from 3,847 holdings. The return also shows that 1,648 males and 2,110 females of the present tenants' families had emigrated to America.

Another interesting fact disclosed by this return is that for a period of thirty years only 214 holdings were acquired by the present tenants or their immediate predecessors, by purchasing the previous tenants' interest. This shows the small proportion of tenancies of this class that are offered for sale, and accounts to a large extent for the high prices which the tenants' interests in small holdings generally realise.

With regard to the number of cattle kept on these small holdings, as shown in this return, it will be observed that the tenants paid, in addition to their rents, a sum of over £1,600 per year, on an average, for the summer grazing of their stock on grass farms which are nearly all situate outside the congested districts, and from six to ten miles distant from their

holdings. In addition to this expenditure the tenants pay beyond their rents a large sum every year for the purchase of artificial manures, estimated at an average of about £1 per holding.

Estates purchased under the Act of 1903.

We have purchased under the Act of 1903 84 estates for Purchase of Estates Act, 1903. £1,106,333. On those estates there were 168,169 acres in the occupation of 6,871 tenants, and 60,240 acres were untenanted.

As we have now to pay higher prices for properties than we had to do previous to the passing of the Act of 1903, and may keep them a shorter time in hands, we cannot hope to deal with them effectively at the same proportion of loss to purchase price (viz., $5\frac{1}{2}$ per cent.), incurred in dealing with the estates purchased previous to the Act of 1903. If in future we dispose of estates more rapidly, and get by the revenue from them a smaller proportion of the necessary outlay, we cannot anticipate that we shall be able to rearrange them in a satisfactory manner at a loss less than 8 per cent. on the purchase money. In short, we cannot, with our present funds deal advantageously with the volume of estates work which the Act of 1903 devolves upon us.

As stated in our previous reports, we have found it impossible to deal economically or satisfactorily with small isolated estates in districts such as the Barony of Erris, and we have accordingly decided to purchase as many estates of this character as possible in each locality, and, grouping them together, carry out a general scheme of improvement and development upon them as if they formed one estate. Grouping of small Estates in isolated district.

Considering the large expenditure that would be necessary to effect a radical change in poor properties of this class, and the small proportion of the outlay which could be charged to the tenant-purchasers without making the holdings too dear, we propose to keep such estates on hands for possibly four or five years, expending meantime the net revenue derived from them in improvement works, for which no charge would be made to the purchasing tenants. Further expenditure out of our own funds would be necessary, and such a sum, having regard to the reproductive character of the outlay, will be added to the sale price of the holdings as may be deemed reasonable in each case.

The progress of our improvement works is considerably delayed by the departure, every spring, of a large number of migratory labourers and by the necessity which obliges able-bodied men to leave our work at intervals during the most favourable weather, in order to attend to the cropping and cultivation of their lands, or, in the case of estates on the sea coast, to engage in fishing. On poor estates the necessary works cannot be carried out in a shorter period than two or three years with the labour of all the men available. No alteration of the holdings can be made except between the end of October and March, the period when the lands are unoccupied. We mention

Purchase of
Estates Act,
1903.

these matters to show that the re-arrangement and improvement of congested estates cannot usually be carried out in a short time.

We have declined to purchase several tenanted estates in congested districts offered to us on which the holdings were fairly well arranged and could be sold without our intervention, as we consider it our special function to deal with tenanted estates within the congested districts which cannot be sold to the tenants without special treatment, and which are capable of being substantially improved. We are prepared, so far as our funds permit, to purchase all the untenanted lands suitable for our purposes which we can get at a fair price, within or near congested districts, but do not seek to purchase any tenanted estates except those situated in congested districts, and consisting mainly of uneconomic holdings needing re-arrangement or enlargement.

To meet the large increase in the volume of our estate business, we have recently increased the strength of our outdoor staff, in the hope of being able to deal as expeditiously as possible with the large number of estates recently purchased.

While we have every reason to be pleased with the beneficial results immediately accruing from our own land improvement works, we are still more gratified with the efforts made by a considerable number of the occupiers to improve their holdings themselves, and reclaim land not previously cultivated. This is especially noticeable on holdings and townlands that were too wet to be improved before the main drainage had been carried out by us. On several estates there are many townlands where the improvements effected by the tenants are so numerous and so well done that the appearance of the estate has been completely transformed.

Referring to the estates, which were sold or partly sold on the 31st March, 1905, we distributed amongst the small land-holders all the untenanted land we could procure in the neighbourhood of the estates as well as all the large tenanted holdings, which we were able to acquire from the occupiers by giving other land in exchange or by purchase of tenant-right interest.

Migration.

When considering the feasibility of the migration of occupiers to lands distant from their present homes as a remedy for the relief of congestion, it must be remembered that the great bulk of the landholders we are dealing with are very poor, and have no capital to work a holding of, say, thirty acres of fair land, nor the means of erecting a house, and if, in view of the poverty of the migrant, new holdings be made much smaller, the cost of buildings and fencing would bear such a high proportion to the value of the land that little of the outlay incidental to planting a pauper landholder on such a holding can be charged to the land without making it too dear; and if only a small portion of the expenditure can be so charged, the cost of settling a large number of migrants with fair prospect of success would involve a loss that would be prohibitive with the funds at our

disposal. For these reasons and others mentioned in previous Migration Reports referred to in the margin, we are of opinion that the migration of a large number of small landholders from a densely congested area to distant tracts of untenanted land in sufficient numbers to relieve congestion is impracticable, and the alternative we endeavoured to put into operation was, to migrate the persons who have the largest holdings within or near the congested districts, and to utilise the land vacated by them for the enlargement of adjacent small holdings.

See 10th Report, p. 28.
11th " 23.
12th " 18.
13th " 15.

The migration of small landholders to land so distant from their present homes that they cannot give any help towards the erection of the buildings or boundary fences, and must, in consequence, be provided with fully equipped holdings, involves a substantial loss in all cases, even after making liberal allowance for the tenant-right value of the lands vacated, but where untenanted land can be procured sufficiently near small holdings to enable us to utilise it for their enlargement, we can always dispose of it in that way without much loss to our funds, not having to erect buildings or carry out expensive improvements. Land so distributed in parcels or allotments and added to existing holdings is most advantageous to the occupiers and for this reason we have, wherever practicable, applied such untenanted lands to the enlargement of holdings, utilising comparatively little for migration. Of the 15,310 acres of untenanted land purchased prior to the Land Act of 1903, we applied 5,927 acres to the formation of 207 new holdings for migrants.

We give in Appendix XXVI. particulars of all the holdings provided for migrants, and of the holdings vacated by them, but this question of migration is of so much importance that we think it desirable to give the following details of our operations.

These particulars may be summarized as follows:—

We have, up to 31st March, 1905, settled 207 migrants on new holdings.

The gross area was 5,927 acres.

The gross estimated fair rent was £2,959.

The average area per holding was 28 acres, and the average rent of each holding was £14.

The purchase price of the fee-simple of the 5,927 acres of untenanted land given to 207 migrants (including landlord and tenant-right interests) was, ...	£66,452
The total expenditure on buildings was, ...	22,848
The total expenditure on erection of boundary fences, ...	4,165
The total expenditure on accommodation roads incidental to striping, ...	1,762
The total expenditure on main drainage and other improvement works, ...	1,536
Total cost of 207 new holdings,	£96,263

Migrations

Deduct value of tenant-right interest of lands vacated by migrants, which was charged to the persons who got these vacated lands as additions to their holdings, ...	£7,210
Deduct sums paid on cash by herds, and others for tenant-right interest of holdings given to them, ...	2,871
	£10,081
Net cost of 207 new holdings given to migrants, ...	£86,182
The prices at which these 207 new holdings were sold to the migrants amounted to, ...	68,611
The net loss incurred in settling the migrants was, ...	
	£17,571

The average loss for settling each migrant was £84.

The dwelling-houses erected on the new holdings were mostly according to plans No. 3 and 4 (see Index Plan in the Appendix). Plan 3 provides for three bedrooms, a kitchen, and small dairy. Plan 4—two bedrooms and kitchen, with a recess in it for a bed. These houses afford the minimum accommodation we consider necessary.

As we hoped these houses would be adopted as a standard by landholders in the locality who may from time to time build new houses, we had most of them plastered, ceiled, and otherwise neatly finished; but in some cases we only put up the shell of the house and the roof, and required the migrant to plaster and finish it at his own expense.

The only savings that might have been effected without serious risk to the success of the migrant were in connection with the plastering, ceiling, and flooring of the dwelling-houses, the outlay on improvement works, and on accommodation roads. In order to explain clearly the expense incidental to settling a migrant on a new holding, and the cost of the required materials and unskilled work which the migrant might, under some circumstances, be able to provide for himself, we give below the average cost of the houses erected according to No. 3 Plan, with the usual out-offices; also average cost of erection of boundary fences for a holding of about 25 acres. This total cost exceeds by about £30 the cost of a house on Plan No. 4.

Dwelling-house, No. 3 Plan.

Mason for building house, ...	£16 15
Unskilled labour, attending masons (foundation and excavating), ...	6 15
Stones, on site, ...	15 10
Sand, do.	3 5

Lime, on site, ...	£3 15	Migration.

Unskilled labour, attending masons, &c., ...	2 0
Timber for roof, and nails for same, .	1 13
Corrugated iron for roofs, and nails, &c., for same, ...	3 15
Carpenter, putting on roof, ...	0 13
Two doors and frames, and a shutter, .	1 12
Total cost, ...	£22 10 0

Mearing Fences.

160 perches of sod fences at 2s. 6d. per perch, £20 0 0

Total cost of buildings and boundary fences, £159 8 0

Migration.

We have recently purchased a considerable area of grass lands in the neighbourhood of Castlereagh and Tulske, which we hope to get gradually occupied by migrants from the Dillon and other congested estates we have purchased in these districts.

In the meantime, or in the event of our failing to dispose of these lands to migrants, we propose to utilise them for the summer grazing of the young stock of the small landholders on the estates mentioned and others which we may acquire in the adjacent congested districts. The young cattle raised by these people on their present poor holdings are usually unsaleable in May, and they would be greatly increased in value after feeding for the summer half-year on good land. Under this scheme landholders from the nearest congested districts might gradually migrate to these tracts, and if they failed to do so and the lands were retained by Board, or sold in divisions to the tenants of groups of townlands for grazing in common, the people would have the use of these grass lands in connection with their holdings and be able to keep more cattle. Many of them would then retain on their small home-farms during the summer no more stock than a milch cow or two, and some young calves, reserving as much as possible of the grass and other feeding for fodder for consumption during winter. They would thus be able to keep more stock on their home-farms during the winter, and have more manure to crop and improve the holdings.

We find it necessary to again call attention to a matter which was commented on in our last Report, in connection with the migration of tenants from the Congested Districts to lands purchased by us outside the boundaries of those districts. Persons living in the neighbourhood of lands in non-congested areas, bought by the Board, often claim to share in such lands before the people of congested districts for whose benefit the Board bought the land; but it is impossible for the Board under the law as it stands to recognize such claims. The 75th Section of the Land Act, 1903, provides that when we purchase land for the benefit of a congested districts county we may not sell any portion of the land so purchased until the wants of the Congested Districts County and of the small tenants residing on the purchased land (which by the Act of 1901 become part of the congested districts) shall have been satisfied. When the claims of such people have been satisfied then, and not till then, may the Board sell under the Land Purchase Acts any parcels of land, which are not required to any tenants or proprietors of holdings not exceeding five pounds in rateable value, on an estate adjacent

to or in the neighbourhood of the land we have purchased, or to Migration.
the sons of such tenants. In other words, our first duty is to
relieve the congestion which exists in the districts assigned to
us; we must satisfy the requirements of the congested districts
county before selling any parcels of land to applicants from the
districts not scheduled as congested.

Although our powers are thus clearly defined by the law,
we constantly receive applications from persons resident in
non-congested districts for holdings on the land we have
acquired in such districts. It should be unnecessary for us to
repeat that we cannot grant such applications except in respect
of such small remnants of land as cannot conveniently be utilised
for the benefit of the districts placed in our charge.

We have already pointed out in our twelfth and previous Legal
Reports the serious legal difficulties experienced in clearing difficulties.
the title of lands purchased from peasant proprietors owing to
the fact that these were vested in them under the Land Purchase
Acts subject to all charges and equities affecting the tenant-
right. In such cases we have been advised that in order to
re-sell these lands in new holdings or parcels under the Land
Purchase Acts it is necessary to investigate the title of each hold-
ing we purchase for a period possibly extending over thirty years
for the purpose of ascertaining that there are no charges or
equities affecting the tenant-right interest.

These investigations are also much complicated by the fact
that very few small landholders assign their interest by a legal
document. The same difficulties arise when we purchase the
tenant-right of a holding for the purpose of enlarging adjacent
small holdings. In addition to the great delay entailed in making
the necessary searches, the legal expenses involved are often
out of proportion to the value of the holdings to be conveyed.
For the relief of congestion it is essential that we should
purchase untenanted land, and it is no less essential that, when
small landholders have been migrated to the new holdings pre-
pared for them, we should be able without long delay and expense
to clear the title to the holdings they have vacated so that we
can utilize them for the enlargement of adjacent small holdings.
The same facilities are necessary when we restrippe intermixed
holdings or buy out the interests of tenants in order to benefit
their neighbours.

In the towns of Ballaghaderreen, Charlestown, and Bally- Town
haunis, on the Dillon Estate, there are 301 holdings paying tenants.
us ground rents; 140 of these were in the occupation of sub-
tenants, and the remainder were in the possession of tenants holding
directly from us. We made arrangements for the sale of the
latter class of cases under the Land Purchase Acts, but a question
having been raised as to the power of the Land Commission to
make advances for non-agricultural holdings, the completion of
these sales was delayed. In the other cases the sub-tenants
appealed to us to purchase the middlemen's interests, and sell to
them. We were unable to do this as the buildings which the
middlemen had erected, on plots for which we received only

ground-rents, could not be considered security for anything approaching the sum which the middlemen would accept. In several of these cases our tenant had sub-let his house to two or more persons who occupied, sometimes, different floors of one house, and each of these sub-tenants wished to buy his tenement by means of an advance under the Land Purchase Acts.

Protection of
Game.

At our meeting on the 16th October last we received a deputation from the Irish Game Protection Association. The deputation professed themselves in favour of the sporting rights being owned by the tenant purchasers of holdings sold under the Land Acts, and referred to the benefit derived by tenants in Scotland and in Wales by protecting game and letting the shooting. The Association recommended two systems by which the preservation of game might be effected; one being the placing of the sporting rights in the hands of trustees appointed by the tenants; the other the letting of the shooting on the condition that each tenant is paid a certain sum for every head of game killed on his land. We assured the members of the deputation of our sympathy with their objects and we undertook to keep their suggestions in view. The Association have since sent us a "draft conveyance" for placing shooting and fishing rights in the hands of trustees on behalf of small landholders; and they have also supplied us with a memorandum drawn up for the information of tenant purchasers which points out the advantages of united action for the preservation of game. We have had this memorandum printed for circulation.

Fairs at
Charlestown.

Having obtained a Patent from His Excellency the Lord Lieutenant granting us power to hold fairs and markets at Charlestown, on the Dillon Estate, and to collect tolls, and having provided a new fair-green in the immediate vicinity of the town, we decided to lease these grounds for a period of ten years to a local body of Trustees constituted as follows:—

1. The Chief Minister of each religious denomination in the parish.
2. The Medical Officer of the district.
3. Four members to be elected by the Parliamentary Voters of the Town of Charlestown.

We have had a Table of Authorised Tolls prepared and posted at the entrance to the fair-green.

II.—SEA FISHERIES.

The records of the results of the fisheries on the coasts of Cork and Kerry, which were worked on a large scale before our Board was constituted, will be found in the Annual Reports of the Inspectors of Irish Fisheries, up to the year 1900, and for subsequent years in the Reports of the Fishery Branch of the Department of Agriculture and Technical Instruction. The

statement of expenditure on piers, &c., given in the Appendix shows that we have granted £27,746 for such works in these two counties in the interests of the fisheries. We have also, since our operations commenced, issued fishery loans to the amount of £22,882 to fishermen in County Cork and County Kerry.

Our Report, for the year ending 31st March last, of the fisheries established or developed by us on the coasts from Galway to Donegal will now be given under the usual heads:—

1. SPRING MACKEREL FISHING.

Along the coast-line northwards of the Aran Islands there was when our Board was formed, no mackerel fishing carried on by means of nets, and no other class of sea-fishing existed on a commercial scale outside Galway Bay. This was owing partly to the absence of transit facilities, partly to the want of piers and suitable boats and gear, but chiefly to the want of technical skill and knowledge. In the case of the mackerel fishing, for example, it was not known that these fish were present in large numbers during the greater portion of the year, at no great distance off the shores of Galway.

Our first experiment in connection with the mackerel fishery was made at the Aran Islands in 1892, and in 1893 the fishery was so successful that the fishermen's receipts amounted to £2,777; and excepting 1894, when the weather was very unfavourable during the season, the Aran fishermen's receipts have since averaged about £2,600 each spring.

Our next experiment was made off Inishboffin Island, the landing place for the fish being Cleggan, a fairly good roadstead, with a small pier, about eight miles from Clifden. This mackerel fishery proved even more successful than that at Aran, as Table A. in Appendix VIII. will show. Doonloughan and Roundstone, in the Clifden district, have also become well-established centres of this fishery. The construction of the railway from Clifden to Galway and the steamer service between the Aran Islands and Galway maintained by a subsidy from us have so far solved the transit difficulty that fresh fish is now despatched to the English markets from the coasts of Galway; but the development of Cleggan, which otherwise is promising, has been checked by the absence of safe accommodation for boats in the bay and the long distance that fish have to be carted in warm weather to the railway.

The mackerel fishery in the spring of 1904, which falls within the period specially dealt with in this Report was fairly successful, the earnings of the fishermen having amounted to the following sums:—

Aran Islands, ...	£2,776
Cleggan, ...	3,465
Doonloughan, ...	442
Blacksod Bay, ...	567
Roundstone, ...	1,439
Total, ...	£8,689

**Aran Spring
Mackerel
Fishery.**

As in previous years the Aran Islanders came to an agreement with a fish merchant to sell their mackerel to him during the spring season at the following prices:—

From 1st to 16th April,	. . .	26s.	per 126 fish.
" 18th to 30th April,	. . .	14s.	" "
" 1st to 31st May,	. . .	12s.	" "
" 1st to 30th June,	. . .	8s.	" "

The fishing, which began very late, lasted from the middle of May to the 2nd of July, and was much interfered with by rough weather.

Cleggan.

At Cleggan many merchants usually attend and bid for the fish, but although thirteen were competing, the prices given were low. As in former years we made arrangements for importing a cargo of 600 tons of ice from Norway. This was stored in a hulk provided by us, and was sold to the merchants as required. On this occasion we lost a considerable sum owing to the weather being so stormy after the ice arrived that it could not be discharged for nearly a week, and as the fishing began later than usual there was further loss from the melting of the ice. The quantity of fish landed at Cleggan, viz.:—10,524 half-boxes fresh, and 243 barrels cured, was above the average of previous years, and the fishermen earned £8,465.

Doonoughan.

At Doonoughan and places to the south of Clifden a fair fishing was obtained, but as prices were low, the earnings were only about £442.

Roundstone.

The mackerel fishing at Roundstone commenced on 26th April, and the fish were sold at prices previously agreed upon with a fish merchant, who had the use of our ice-hulk. The 5,090 half-boxes landed here were a fair quantity, but owing to low prices the earnings only reached £1,439 for thirteen large boats.

**Blacksod
Point.**

Our last experiment for the development of a new mackerel fishery, off Achill and the Inishkea Islands, with Blacksod Point as a landing place, has been described in our preceding reports. In 1904 we again chartered a small steamer to carry the fish from Blacksod to Tonragee railway siding in Achill Sound, and we arranged contract prices with a fish merchant. Only seven large boats and fifteen small ones engaged in the fishing, and the results were on too small a scale to justify our outlay. Seeing that there had been a decrease in the number of boats fishing, both in 1903 and 1904, that a difficulty had been experienced in finding crews for the "shars boats" which we provided, and that the majority of the fishermen had expressed their willingness to fish from Cleggan in future, we decided to discontinue this station and transfer our boats to Cleggan. The total earnings of the fishermen last year were £567, and our loss by the hire of the steamer "Princess Louise" was £178 11s. 5d.

2. AUTUMN MACKEREL FISHERY.

**Tory Island
Station.**

The autumn mackerel fishing at Tory Island was very poor. The islanders fished with tram-nets from the shore, and they were

very successful in the summer herring fishing, but during August and September mackerel did not come near enough to the shore to enable those nets to be used. There were two or three buyers on the island, but not more than thirty barrels were cured. The islanders used the same nets for mackerel as for herrings, and the whole adult population are ready to take part in the work when fish appear.

The fishing at Cleggan and Inishboffin began on 1st July and continued till the 17th December, but the bad weather prevented the boats from going to sea. There were several buyers, and a fleet of fifty-six small boats was engaged in the fishing. The total earnings of the fishermen amounted during the autumn mackerel season to about £1,200, exclusive of a further sum of £270 earned by curers, &c., in the district.

Cleggan and
Inishboffin

The mackerel fishing at Aran Island was very poor, and in South Aran was practically nil.

The fishing in the Clifden district began on 1st August and closed late in November, and was very poor, principally owing to bad weather which not only interfered with the fishing, but caused heavy losses and damage to nets.

Clifden,
Doonloughan
and Tully,
Co. Galway.

Table C. in the Appendix shows the value of the fish caught at each station.

The sale of both mackerel and herrings in the American markets improved during the year 1904, especially during the spring months. In the winter the prices for Irish cured mackerel had been rather low, with a dull demand, but an improvement has since taken place. For some time the mackerel were of a smaller size than usual, which may have checked sales, but as the fish, in spite of their small size, were of excellent quality they secured a good position in the market, when the consumers had had an opportunity of trying the fish. The improvement in the demand was no doubt to some extent due to the partial failure of the fishing on the American coast.

American
Markets.

The fish curer to whom the curing station on Clare Island had been let by the Board did not come to the island, and the curing station was consequently opened by the Board. The fishing was extremely poor, only a few barrels being cured, and these were sold locally. Nearly all these were caught by seine nets belonging to the Board, and lent as an experiment, as had been done in the previous year.

Clare Island.

The fishing began at Portarlin on 1st August, and was fairly good, continuing up to the 31st December. At Belderrig and Portacloy the season opened a fortnight later, and the fishing was very poor; while at Munigreena there were hardly any mackerel caught during the season, which extended from the 1st September to 17th December. At the three places first mentioned the fishing is carried on entirely by fifteen small boats and sixty canoes.

North Mayo
Stations,
Munigreena
Portacloy,
Portarlin,
Belderrig.

None of the Board's share boats took part in this fishing, which was confined to the local small boats.

3. SUMMER HERRING FISHERY.

Downing's
Bay.

The summer herring fishing at some ten to thirty miles off the north coast of County Donegal was commenced as an experiment in 1901, when 918 barrels were obtained by six boats. This success was sufficient to attract fifty large Scotch boats, in addition to six of our own, in the summer of 1902, and from that time the reputation of the fishery may be regarded as being fully established not only by the quantity caught, but by the superior quality of the fish.

In the following year the value of the fish landed at Downing's Bay by a still larger fleet was £10,000, and when it is remembered that this was the result of five weeks' work it must be considered eminently satisfactory. Early in May, 1904, the season on which we have now to report, about 100 Scotch boats and more than thirty "steam drifters" with about sixteen of our Donegal fleet, engaged in the fishing, but it was not until the 23rd May, after many of the Scotch boats had given up the fishing as a failure, that our boats began to do well, and to obtain prices as high as 60s. or 70s. per cran.

The best success was met with close to Tory Island, and the islanders made large catches with seine nets worked by open boats. During the three good weeks now referred to the Tory men probably made £1,400.

Our sixteen large boats netted £2,183, and including the gains of the open boats from Tory and the mainland, it is estimated that the Irish boats made £3,464, while the visitors, who had a large fleet manned by over 900 men, made £7,648. All the fish were cured, and 10,120 barrels were sent to the continental markets, where it is stated they realised the highest prices.

Burton Port

Several steam drifters fished near Burtonpoint in April, but only 200 crans were landed, and the herrings left the coast about the end of April.

Malin Head.

Fifteen or twenty steam drifters fished off Malin Head, and took about 2,300 crans, of rather poor quality.

4. AUTUMN HERRING FISHERY.

Downing's
Bay.

The summer herring fishing on the north coast of Donegal described above, ended about the 11th June, and the autumn fishing opened early in September. All our large boats, to the number of fifty-seven, from Teelin, Kincasslagh, Gola Island and Tory Island, had gone round to Downing's Bay. The fishing was not good, both quantity and quality being unsatisfactory, and our boats earned only £1,550.

In the later part of the season the weather became stormy, and two of our boats dragged their anchors and were stranded, while another and a Scotch boat became total wrecks in the same gale. In north-west gales a heavy ground sea comes into Downing's Bay, making it difficult to keep such a large fleet of boats clear of each other while at anchor, and the injury done by the gale now referred to shows the need of the extension of

Downing's Pier now being carried out under the Marine Works Act.

Four hundred boxes of fresh herrings and 4,400 barrels of cured fish were despatched last autumn from Kilcasslagh and Gortnasate, County Donegal, putting about £2,227 into the pockets of the fishermen. Kilcasslagh and Gortnasate.

At other Donegal stations, Gola Island, Magheragallon and Bunbeg, the autumn fishing was prosecuted by about 25 open boats, and the earnings amounted to about £518. In the Burtonport district the fishing did not begin until early in December, and continued until February. About 800 men were engaged, and the total earnings reached £5,510, not including £460 made by the curers and others working ashore. In Loughros Bay also there was a good herring fishing for about three weeks in November and December, about 100 open boats, chiefly yawls from the Rosses district, being engaged. The fish were landed at Rosbeg, and as Glenties, the nearest railway station, is about six miles from Rosbeg, about 100 carts were employed in carrying the fish, and it is estimated that the neighbouring farmers made as much as £600 by this work. The earnings of the fishermen were about £4,500, and if the earnings at the herring fishery last year, at the places we have enumerated above are added together, it will be found that they reached the very respectable figure of £30,000, including the wages paid to the workers on shore. Magheragallon
Bunbeg, etc.

Six of the Board's boats went to Darby's Point in Achill for the autumn herring fishing, most of the men being natives of Achill Island or Curraun Achill. The fishing began on the 8th August, and closed on the 15th October, but only poor success was obtained owing to bad weather which prevailed through the greater part of the season. Darby's Point

Altogether there were nine large and forty small boats at the fishing, and the total takes of the fishermen only reached £380 for herrings and mackerel.

Herrings are taken at many places on the Donegal, Mayo, and Galway coasts, from Downing's Bay round to the Aran Islands, in the autumn and winter months, and the tables issued with our annual Reports show that the fishermen's gains amount to about £20,000 each season. At Rosbeg which is included in this area, the fishing was the largest on record. In the past year the produce of this fishery, given in Appendix No. XV. B. showed a general falling off, and the total receipts of the fishermen did not amount to more than £14,905.

The cured herrings from Donegal as usual took the leading position in the New York market, and made higher prices than either Scotch or Shetland herrings.

5. CONGER, SKATE, COD, LING, AND GLASSON.

The long-line fishing in Co. Donegal was not good except at Teelin, where a fairly good catch was made between 1st February and 22nd April, but for the first part of the period the fishing was confined to large boats, owing to the very bad Long Line
Fishing,
Teelin.

weather in February and March, which prevented small boats from fishing. In addition to white fish, some herrings were obtained towards the end of the season, but the total sum earned at Teelin by the fishermen only reached £318, or just over an average of £2 for each of the 150 men employed in 5 large and 15 small boats.

North Mayo
Stations.

At Rinroe, Porturlin, and Portacloy, the fishing lasted from 1st January to the end of May, but was very poor owing to continuous bad weather. Only 13 small boats fished, and the earnings were very small.

Aran Islands,
Co. Galway.

Long-line fishery began at Kilronan early in February, but only lasted a few weeks, although a few canoes fished as late as the middle of May. The fishing was confined to small boats, all the large boats being engaged in herring fishing.

The total earnings for white fish at Kilronan amounted to £46.

South Aran
Island.

At South Aran the fishing was more satisfactory. As already stated, the autumn fishing here was almost entirely confined to white fish caught along the shore. The fishing ended late in December, and the long-line fishing began on 9th January and lasted till 8th April. The Board's share yaws started late, as they did not go out till the 25th January. The boats numbered 19 in all, and earned £387 5s.

6. CURED FISH TRADE.

Fourteen of our twenty curing stations were let to fish-merchants last season, after the issue of the usual public notices inviting tenders.

Only one station, that at Clare Island, was opened by ourselves in consequence of there being no merchant there to buy and cure herrings. The quantity caught by the islanders was, however, insignificant.

7. INSTRUCTION IN FISHING.

Instruction in
fishing

A large number of new crews having been provided with boats during the past year, chiefly at Downing's Bay, we had to employ seventy-four instructors for periods varying from a few weeks to several months. Of those instructors 29 were Irish and 45 from Scotland. The development of the new summer herring fishery in Donegal has considerably extended the time during which instructors are required. Our expenditure under this head last year was £5,088, showing little decrease since the previous year, notwithstanding that we do not give free instruction so liberally as we formerly did. Our rule now is, for boats purchased by means of loans:—

- (a) To give instruction free for two seasons, if in our opinion it is required.
- (b) To charge ten shillings per week to the crew or boat-owner for instruction in a third season, 20s. for a fourth season, and 30s. for a fifth season,

The option, hitherto allowed, of giving a fixed share of the earnings in lieu of the weekly charge has now been withdrawn. Instruction in Fishing.

The amount repaid during the year under the above rules was £843 in reduction of the total cost of instruction mentioned above.

Two boats, the *Ruby* and *Diamond*, were specially allotted under a separate scheme of instruction to crews from South Co. Galway. The boats remained the property of the Board, the men being given 6s. grub money each per week, repayable out of the gross earnings of the boats, and receiving a half share of the nett earnings. These boats fished during the spring and autumn mackerel seasons for a period of, in all thirty weeks. Each had an instructor on board, and the net cost to the Board, including the instructors' expenses and salaries, was, in the case of the *Ruby*, £92 0s. 8d., and of the *Diamond*, £69 17s., after paying £88 11s. 10d. to the two crews for grub money and their shares of the fish.

8. BOAT-BUILDING.

One new Zulu boat was completed at our Aran boat-yard, and four Zulus were turned out by the Killybegs Industrial School.

In addition to these boats three "nobbies" were purchased in Ireland, and one Zulu in Scotland.

In all, 37 decked fishing boats (22 nobbies and 15 Zulus) had, up to 31st March, been built at yards on the west coast, since building was first commenced in them under instruction provided by us, and the total number of boats built to our order up to that date at various places was 111, and the approximate cost was £20,202.

9. LOAN AND SHARE BOATS.

During the past year four "Zulu" boats were added to the Board's Donegal fleet, making the number of these decked herring boats fifty-seven. The "Nobbies" or decked mackerel boats on the Galway and Mayo coasts were reduced from twenty to thirteen, seven having been sold. The two classes of boats above-mentioned, comprising the Board's fleet worked on the share-system, numbered together seventy, and with their gear cost £19,358, of which £8,434 has been repaid, in addition to £5,264 deducted from the earnings for the cost of instruction. The total earnings of the boats, that is, the net produce of the fish sold, amounted to £6,317 in the past year. Boats on share system.

The capital of Fishery Loans transferred to us by the Board of Works in 1893 amounted to £36,685, including all instalments of interest and principal then unpaid, but excluding the £50,000 which we applied to other purposes in 1893 and the following years. Of the total of £36,685 we have since collected £30,846, and have written off as irrecoverable £4,710, leaving a balance of £1,129 to be collected. The loans made by us since 1893 amounted to £72,964. (See Appendix XI.) Loans.

Since our work commenced, in 1892, eighty-three loans for large boats, including some cases transferred to us in 1893 from the Commissioners of Public Works, have been paid off by the owners.

Loans amounting to £8,462 were made in the year for fishing boats and gear, and nineteen large boats purchased by this means brought up the total number of loan-boats to 104. The entire fleet of large fishing boats now on the Board's books, including both loan and share-boats, numbers 174, only one of them being owned outside the Congested Districts.

Repayment of
Loans.

We regret that for some years the instalments of loans due on several large fishing boats owned in South Connemara have been seriously in arrear, and in three cases we have had to close the mortgage and take up the boats. In twenty-one other cases we have placed a collector in charge to receive the proceeds of the fish caught and credit us with a fair proportion of the earnings. When the boats on this coast are unsuccessful at the mackerel fishing they appear to have some difficulty in meeting their engagements; but in most of the cases we now refer to the earnings of the boats, if applied in a proper manner, would have been sufficient to support the fisherman, to maintain the efficiency of the boat and gear, and also to repay the greater part of the instalments now in arrear.

10. NET-MENDING.

Classes for instruction in net-mending were held at Onagh in Aran Island, and at Letterfrack, County Galway, and at Blacksod Point, County Mayo.

11. BARREL-MAKING.

Our steamer, the *Granuaile*, again brought a large quantity of Norwegian barrel-making materials from the east coast of Scotland, supplying our two Donegal cooperages, and various coopers in Counties Cork, Kerry, and Galway, who purchase from us on easy terms of repayment. The new cooperage has been completed at Downing's Bay, in lieu of the cooperage at Teelin, which has been closed, and it has become necessary to enlarge the cooperage at Burtonport. The total number of barrels made at our works in the year was 15,251, and the number sold was 10,516.

12. FISHERY LIGHTS.

The thirty-day Wigham lights on Cleggan Head and Leighon Head, Innishboffin, continue to give satisfaction, but some improvement of the Cleggan Head light is in contemplation. The seven-day Wigham lamp on Brandon Pier is also fulfilling its purpose very well. The ninety-day lamp on Deer Island near Roundstone acts well but is scarcely of sufficient power, and

as Messrs. Wigham are now able to supply a three-wick lamp of ^{Fishery} practically three times the power of the present lamp, the latter ^{Lights} will be replaced and transferred to another site where it would meet the local requirements. At Wyon Head, near Dungloe, County Donegal, a thirty-day lamp has been erected, and will be used when the Autumn Fishing commences. At Portnablagh, County Donegal, a seven-day lamp has been provided in readiness for the Autumn Fishing, and at Killybegs, Aran Islands, a new acetylene "leading light" has been placed in position and will be lighted when required. A small lamp has also been erected on Cleggan Pier.

III.—INDUSTRIES.

There has been a steady demand for the best quality of lace during the past year, and those classes engaged on Limerick and Appliqué Lace have done a fair amount of business. Guipure Lace also is being more inquired for, and there has been a brisk demand for crochet, especially for the best patterns of fine work. Connemara Lace Curtains which are sold by Messrs. Morton, of Darvel, Ayrshire, have also found a ready sale.

There is more difficulty in getting workers to adopt new patterns of crochet than in any other description of lace, owing to the fact that crochet work, unlike other laces, becomes more or less an automatic process, and the worker acquires dexterity in constant repetition of the same forms and combinations. New patterns mean loss of time, and a temporary restriction of output and earnings, and there is consequently a general reluctance on the part of workers to make other patterns than those in which they have become expert. The future of Irish crochet will however to a great extent depend on the workers being ready to meet the demand of the trade for new designs, crochet having to compete with machine-made work as well as with Continental hand-made work. The latter may become a more formidable rival in the future if Irish workers do not show more readiness to produce a greater variety of designs.

In many centres the extension of Home Industries has been seriously checked by the emigration of the best workers, very frequently those who, by means of the employment given have saved money. Home industries also suffer seriously through the irregular and unpunctual habits of workers, who do not appear to place any value on time. Delays and disappointments in the execution of orders affect injuriously the expansion of trade, which is dependant on prompt delivery.

The Lace Industry cannot progress and spread unless the workers can be relied on to do their part in the chain of demand and supply. Wholesale customers in Paris and New York are frequently irritated by unpunctuality in delivery of orders, due to a want of energy on the part of a few workers in some remote village in the West of Ireland. Industrial habits are of slow growth, especially in districts where there has been

Industries.

heretofore no such employment, and where there is little appreciation of the value of time. Steady and punctual attendance at school during early life would appear to be an essential preparation for industrial success in later years. In many districts in the West of Ireland this want of early discipline no doubt acts prejudicially on industrial progress.

The turnover of the Board's Industrial Classes for the year, exclusive of sales made by workers direct to local buyers, was £12,000. It might, however, have been very considerably more, but for the causes above indicated.

DRAWING.

With a view to improve the character of the work instruction in drawing has been given at several classes, and deserving pupils in several districts have been assisted to attend a course of instruction at the Metropolitan School of Art, Dublin.

HOMESPUNS.

At the Board's Depots at Ardara and Carrick, in addition to measuring some 2,700 webs during the year, a system of grading and marking the pieces according to quality has been in operation. The demand for goods has been fairly uniform, at about the average price. There were numerous applications for improved looms from Mayo and Galway, as well as Donegal, and we have met this demand by the issue of looms for the purpose. Instruction in weaving and dyeing was given at Lecnane and Clonbur, (County Galway), at Carrigart and Kindrum (County Donegal), and also at Glonbeigh and Ardca (County Kerry).

DONEGAL CARPETS.

Messrs. A. Morton & Co., of Darvel, have during the past year opened two new carpet factories, one at Crolly and one at Annagry, both in the Rosses district of County Donegal and capable of accommodating from 150 to 200 workers each. These factories are already giving a considerable amount of employment, which was much required in this very congested district.

MACHINE KNITTING.

Several applications have been received during the year for instruction in Machine Knitting, and where local arrangements were made for the sale of the production, the Board gave the services of a teacher for instructional purposes.

DOMESTIC TRAINING CLASSES.

The applications for Domestic Training Classes have been very numerous, and the services of the Board's six teachers have been engaged a considerable time in advance. These classes continue four months at each centre, and have in every case been of great practical utility, and we have received many expressions of appreciation from the people of the districts where they were held. The primary object is to improve the methods practised by the people in their own homes, but where the pupils trained were willing to go to domestic service, they were able to secure situations without any difficulty at much better wages than they could have obtained without this instruction.

CARPENTRY CLASSES.

These classes have been well attended during the year, and many of the pupils have done work required in their own homes, or on their farms, such as the construction of windows, doors, gates, wheelbarrows, carts, and other useful articles. The system of making industrial loans to the pupils on proper security for the purchase of tools has been largely availed of, and in this way the advantages of the classes extend beyond the immediate period of the instruction.

LIST OF INDUSTRIAL CLASSES.

Lace Classes at Glencolumbkille (County Donegal), Gurteen and Banada (County Sligo), Ardnaree and Kiltinagh (County Mayo), Oughterard (County Galway), Shanacuan (County Kerry), and Ballingearry and Glengarriffe (County Cork).

Crochet classes at Arlara, Creovo, and Massinass (County Donegal), Cliffoney and Magherow (County Sligo), Kiltyclogher (County Leitrim), Bangor, Attymass, Carratigue, Corolough, Derrindaffderg, Derrypark, Doohoma, Foxpoint, Glenamoy, Pulathomas, and Russport (County Mayo), Carna, Costello, Rosmuck, Spiddal, and Dunmore (County Galway).

Embroidery and Drawn Work Classes at Arlara (County Donegal), and Derrow, Partry, and Shrah (County Mayo).

Lace Curtain Classes at Carraroe, Lettermore, Lettermullen, Kilkerrin, and Clifden (County Galway).

NEW CLASSES.

In addition to the above the following new Classes have been opened, some of which are only a few months in existence, viz. :— Crochet Classes at Dungloe, and Fintown (County Donegal), Roscahill and Clonbur (County Galway), Belmullet and Ballycroy (County Mayo), Kilcrohane (County Cork), Cahirciveen (County Kerry), Embroidery at Carrigart (County Donegal).

Industries.

Carpentry Classes have been held at Aughamore and Kiltimagh (County Mayo), Kilmactigue (County Sligo), Clonbur, and Cashel (County Galway), Glencar (County Kerry), and Glengarriffe (County Cork).

Weaving and Dyeing Instruction has been given at Leenane and Clonbur (County Galway), Glenbeigh and Ardea (County Kerry), and Carrigart and Kindrum (County Donegal).

Domestic Training Classes have been held at Killybegs, Ardara, Downstrands (Narín), Glenties, Fintona, Kindrum, and Tarmon (County Donegal), Garvagh (County Leitrim), Bekan (County Mayo), Kilonan, Inisheer, Clonbur (County Galway), Castlecove, Waterville, and Kenmare (County Kerry).

Machine Knitting Classes were held at Bunbeg (County Donegal).

IV.—ENGINEERING WORKS AND PARISH COMMITTEES.

The net expenditure on Works during the past year amounted to £4,206, divided as follows:—

	£
Marine Works, Piers, Slips, &c., ...	2,402
Roads, Bridges, Drainage Works, &c., carried out by the Board, ...	680
Roads, Bridges, &c., carried out by County Authorities or the Board of Works, aided by contributions from the Board amounting to }	1,124
Total, ...	£4,206

The details are given in Appendix No. XX.

Our expenditure on marine works, roads, bridges, &c., has again, from various causes, fallen much below the sum estimated. As our contribution towards certain projects undertaken by the Commissioners of Public Works under the Marine Works Act, 1902, we voted the following sums, but were not called upon to pay any part of our grant during the past year:—

	£
Cleggan Pier, Co. Galway, ...	260
Roundstone Pier, Co. Galway, ...	250
Kilronan Pier, Co. Galway, ...	240
Cape Clear Harbour, Co. Cork, ...	500
Gortnasate Pier, Co. Donegal, ...	500
Cladinageragh Pier, Co. Donegal, ...	150
Portinoo Pier, Co. Donegal, ...	300
Downing's Pier, Co. Donegal, ...	450
Total, ...	£2,650

We also offered a grant of £500 towards the cost of extending Engineering Works. Castletownbere Pier, a similar sum for the improvement of the pier at Courtmacsherry, and £1,000 and £700 for new piers at Adrigole and Glengarriff respectively; but there was no expenditure on any of these works in the financial year. For various reasons work has been postponed in many other cases where we had offered assistance.

At a cost of nearly £400 we have constructed a footbridge Mockinagh Bridge. across a narrow inlet of the sea in South Connemara, where a village was cut off from access to the public road, and a National School which stood within a mile of the village. No children from this village had for generations, we are informed, received any education, and the wretchedness of the village and its surroundings could not be exceeded in Connemara. As adjuncts to the bridge, which required a high span to allow boats to pass, we have constructed an approach road and a small quay for the landing of seaweed, sand, etc.

The Waterworks at Roundstown, Connemara, a fishing village, Roundstown Waterworks. have been completed at a cost of over £1,000, of which we consented to contribute £600, on the ground that the fishing industry would derive advantage.

At Belmullet, over the canal uniting Broadhaven with Blacksod Bay, a new swing-bridge has been built by the County Belmullet Bridge. Council at a cost of £900, including a grant of £450 contributed by us.

We have expended £321 in the construction of a sea-wall at Aran Island Slips. Traghtagh, a very exposed spot on the South Island of Aran, County Galway, in the channel between the Middle and South Islands. Boats will now be able to land fish at this place when the sea prevents a landing on the beach.

The boat-slip constructed some years ago by the County Council at Inishmaan Island, Aran, having been destroyed by the heavy seas to which it was exposed, we undertook to re-construct it, and have expended nearly £900 on the work, which will shortly be completed.

At Whiteport on Loughros More Bay, Co. Donegal, where a Whiteport Slip. large number of herring-boats are kept, and had no convenient landing-place at low water, we have constructed a slip, at a cost of £371, at which fish can be landed at all states of the tide.

We have also constructed a slip at Toor in the great cliffs near Toor Slip. Three Castle Head, Co. Cork, at a cost of £450. It enables men living in a very remote district to profit by the valuable mackerel fishery close to their homes. In this and many other places where the Board have found it desirable to construct marine works for the assistance of fishermen the engineering difficulties have been very great owing to the exposed nature of the coast.

For several years past our engineering staff has given assistance to the Department of Agriculture, which has repaid us for the time occupied by each member of the staff in the business of the Department. Engineering Staff.

The rapid increase in the number and importance of the Department's engineering works as well as the simultaneous

decrease in our own, owing to our policy of further concentrating our efforts on land purchase and settlement operations, have led to the conclusion of a new arrangement by which the entire staff will be placed on the books of the Department, and we shall pay in detail for the work done for us.

PARISH COMMITTEES.

Parish Committees.

The instructions we have issued for the management of these Committees were reprinted in the Appendix of our Thirteenth Annual Report, and we need not now give any description of their organization. The results of their operations continue to be most satisfactory, and last year we offered grants amounting to £8,427 to 102 parishes in Connaught and Munster, besides £1,924 to 84 parishes in County Donegal, where the grants are smaller and the transactions of the Committees are not so closely supervised in our office as are those of the Committees in receipt of larger grants in the western and southern districts. Although the total amount of the grants voted by us was considerably larger than in the previous year the sum actually paid, exclusive of County Donegal, was only £6,268, against £6,728 in the year 1903-4. This is accounted for by the wet winter having delayed the execution of works, so that a large proportion were not completed or paid for by us before the 31st March last, and cannot therefore appear in the returns now given. (See Appendix XXI.)

Under the conditions of the scheme the value of the work done by the landholders to whom the small grants, generally from £1 to £3, are made, is greatly in excess of the payments made by us. Excluding County Donegal, the works done last year were valued at £27,095, while our grants were only £6,268. The nature of the works carried out was as follows:—

- (a.) Erection of new dwelling-houses, or the improvement of existing dwellings. 1,192 works were undertaken, the estimated cost being £9,505, in respect of which grants to the extent of £2,237 were made.
- (b.) In 1,533 cases the erection of new out-offices and improvement of existing buildings were undertaken, the estimated value of the works being £13,317, and the grants sanctioned were £3,137. It is the primary duty of the Parish Committees to cause the cattle to be removed from the dwellings of the people, and although considerable progress has been made in this direction much remains to be done.
- (c.) Drainage and Fencing.—277 works, estimated to cost £1,366, in respect of which grants amounting to £305 were sanctioned.
- (d.) 213 works, comprising the making of new and the repair of existing roads, were approved, the grants in the aggregate amounting to £478, and work to the estimated value of £2,360 was undertaken.

- (e) Reclamation of waste land and other unclassified works, to the number of 81, were undertaken, the grants amounting to £111, and the value of the work to £527. Parish Committees.

The additional parishes included in the scheme last year were chiefly in the counties of Cork, Kerry, and Leitrim, and the manner in which the business was conducted in the new parishes promises well, for it leads us to believe that the scheme will be carried out in a thorough manner when it is fully understood. In five of the 102 parishes in Connaught and Munster no committees were formed in time to carry out works last year.

In order to give the benefit of the grants to the poorer class of landholders we last year reduced the limit of Poor Law Valuation for recipients of grants, from £10 to £7.

Under the revised regulations the committees in parishes where the people are not generally "migratory labourers" are allowed to commence works in May or June instead of the autumn, as in other parishes.

The working of the "Prize Schemes" amongst the Donegal Parish Committees will be understood from the following example of a list of prizes offered in some of the parishes:— Donegal Committees

- | | £ s. d. |
|---|---------|
| 1. For building new dwellinghouse, prizes of £3 each. | |
| 2. Replacing old roof of dwellinghouse by a new one, ... | 1 10 0 |
| 3. Additional room to house, ... | 1 0 0 |
| 4. Plastering of dwellinghouse internally or externally, ... | 0 15 0 |
| 5. Taking down and re-building smoky chimney shaft, ... | 0 10 0 |
| 6. New floor in bedroom or kitchen, ... | 0 10 0 |
| 7. Building byre, ... | 0 15 0 |
| 8. New piggery or poultry-house, ... | 0 10 0 |
| 9. New road to dwellinghouse, including street, ... | 0 10 0 |
| 10. Making and cultivating cottage garden, the fences to be at least five feet high, ... | 1 0 0 |
| 11. <i>Reclamation of Land.</i> —For the reclamation of an area of rough land, of not less than 1 rood, a prize of 10s.; $\frac{1}{2}$ acre, £1; 3 roods, £1 10s.; 1 acre, £2. | |
| 12. <i>Drainage of Land.</i> —For making not less than 20 perches of stone pipe drains, 10s.; 30 perches of sod-covered drains, 10s.; and 40 perches of open drains, at least 3ft. 6in. deep, 10s.; and for twice the above lineal dimensions, a prize of £1. | |
| 13. <i>Fencing of Arable Land.</i> —For making not less than 20 perches of stone, and 40 perches of sod fencing, a prize of 15s.; and for fencing twice the above lineal dimensions, a prize of £1 10s. | |
| 14. <i>Planting of Trees with a view to Shelter.</i> —For planting not less than 100 trees, properly fenced in, a prize of £1; or not less than 20 perches of thorn-quick fence, a prize of 15s. | |

Norm.—Under the Regulations, it is an indispensable condition, preliminary to payment to any Occupier that the Cattle, etc., shall not be kept in the Dwellinghouse, and that the Manure Pit shall be located at least the prescribed distance (20 yards) from the dwelling.

Parish
Committees.

On referring to the list of grants given in the Appendix it will be noted that the grant to Arranmore Parish is £200, and is far in excess of the sums allotted to other parishes in County Donegal. The explanation is that the Board purchased the Island of Arranmore, which formed the Charley Estate and in lieu of expending a large sum on the improvement of the cottages, as at first intended, we made a special grant to the Parish Committee in order to have the work done by means of this local organization.

Excluding the Island of Arranmore, works were undertaken in thirty-three parishes, to which grants amounting in all to £1,934 were made by the Board, and 2,369 landholders notified their intention of competing for prizes. The number who obtained prizes was 1,442, and the estimated value of the work done by all the competitors in the thirty-three parishes was £12,843, or an average of £6 12s. of work done for each pound paid by the Board. The works were:—The improvement of dwelling-houses; the building of out-offices for cattle; fencing; draining; road-making, &c.

V.—MISCELLANEOUS MATTERS.

Railway
banks.

The list of agricultural banks given in the Appendix contains the names of eighty-six of these Credit Societies which have been established in the congested districts. Sixty-nine of them, having obtained sufficient capital, were carrying on business.

In sixty-seven cases we had lent a portion or the whole of the capital employed, the total amount lent by us being £5,850 or an average of £87 to each bank, while the capital obtained from other sources by forty-eight societies was £4,991. We have not yet received from twelve of the banks the particulars of their transactions in the past year.

It is satisfactory to note that the business done by these institutions is steadily increasing, and that they are receiving more financial support from persons living in the districts where they work and who are acquainted with their organization and methods.

Kelp Trade.

The reports we have received show that the kelp industry was fairly prosperous last year, the price of burnt kelp averaging nearly £4 per ton, while 30s. per ton was paid at Roundstone and some other places for the best unburnt weed. The quantity of kelp sold was above the average of former years.

Local Agri-
cultural
Shows.

In the Appendix will be found a list of the local agricultural societies to which we made grants to assist in providing prizes at annual shows.

Subsidies to
Steamer
Services.

We have renewed, for a further term of five years, the agreement with the Galway Bay Steamboat Company, under which we give a subsidy of £700 a-year to maintain the

service, three days in the week, between Galway and the Aran Islands. Having obtained a lease from the County Council, we are about to construct a range of buildings on the pier at Killoan, to provide a store and offices for the Steamer Service, and a large net store.

In September last we received an application from the Clyde Shipping Company for an increase of the subsidy of £500 a-year which we had given, for three years, to assist that Company in running a steamer between Cork and Dingle, calling at Sneem, Cahirciveen, and other intermediate places. As we were not of opinion that the benefit conferred on the coast population by the service were sufficient to warrant a larger grant from our funds, and, as there had been considerable opposition from various local sources to our giving any subsidy to the Clyde Company, we declined to increase our grant, and the steamer ceased to run. We have, however, concluded an agreement with the Great Southern and Western Railway and the Cork, Bandon and South Coast Railway Companies, by which existing railway rates for goods carried to Kenmare, Bantry, and Tralee will not be increased and by which a special schedule of reduced rates has been fixed for Sneem *via* Kenmare, on our undertaking that we will not subsidize any line of steamers plying on the south-west coast except it be a purely local service, that is, one not terminating at or beyond either Cork or Limerick.

Subsidies to
Steamer
Services.

In October last a request was made to us by Her Excellency the Countess of Dudley, on behalf of the Committee of the Fund for the establishment of District Nurses in Ireland, for assistance in providing house accommodation for a nurse at several places in the congested districts, where suitable cottages or lodgings could not be obtained.

Lady Dudley's
Nursing Fund.

Her Excellency named Geesala, in the Ballycroy district, County Mayo, Glengariff, County Cork, and Arranmore Island, County Donegal and we have undertaken to purchase or build a cottage at each of those places, charging the Committee interest on our outlay. We entertain no doubt as to the great value of the assistance given, and of the personal influence exerted by the nurses employed by this fund in poor and backward districts where insanitary conditions are so prevalent. Improvement must evidently commence in the home.

On the occasion of the resignation by Mr. Wyndham of the office of Chief Secretary for Ireland, in March last, the following resolution, proposed by the Most Rev. Dr. O'Donnell, and seconded by Mr. W. P. Geoghegan, was passed unanimously at a meeting of our Board:—

Membership of
Board.

"That at their first meeting since the retirement of Mr. Wyndham the members of the Congested Districts Board desire to place on record their lively appreciation of the great ability and keen sympathy which, as Chairman of the Board, he ever evinced in dealing with the needs of the congested districts; and that the best wishes of the Board are hereby conveyed to him for a great career worthy alike of his talents and of his past services in the public interest."

Co-operation
of Royal
Irish Con-
stabulary,
&c.

We have been, as in many previous years, under great obligations to the Inspector-General of the Royal Irish Constabulary and to the officers and members of the Force, and also to the officers and men of the Coast Guard Service, for very valuable assistance given in connection with fishery and other operations.

Accounts.

The accounts of receipts and payments in the year ending 31st March last, as furnished to the Comptroller and Auditor-General, with full details under each head, and statements of the loans issued, are submitted in the Appendix of this Report.

We have the honour to be

APPENDIX XXIV.
IRISH LAND ACT, 1903.

RULES AND REGULATIONS MADE BY THE TREASURY.

(SO FAR AS THEY RELATE DIRECTLY TO THE CONGESTED DISTRICTS BOARD.)

25. Where the Land Commission make an advance to a tenant for the purchase of his holding from the Congested Districts Board, the following provisions shall apply:—

- (1.) In the case of an estate purchased by the Congested Districts Board under the Land Law (Ireland) Act, 1896, for the benefit of any county, notice of such proposed advance shall be given to the Congested Districts Board and, if a corresponding amount of the advances to the Congested Districts Board out-standing on account of the same county be redeemed within seven days of such notice, the amount shall be paid to that Board. Failing such redemption, the advance shall be written off the debt due from the Board for advances made to them on account of that county.
- (2.) In the case of an estate purchased by the Congested Districts Board under the Irish Land Act, 1903, an advance to a tenant for the purchase of his holding or to a vendor for the re-purchase of a portion of an estate from the Congested Districts Board shall be written off the debt due from the Board for advances made to them on account of such estate.
- (3.) On the re-sale of an estate all cash payments, made by purchasers from the Congested Districts Board in full or part payment of the purchase money payable by them, shall forthwith be paid over by the Congested Districts Board through the medium of the Land Commission to the Irish Land Purchase Fund in redemption of an equal amount of the original advance then out-standing.

Re-sale of
Estates

27. Interest on all sums advanced to the Congested Districts Board shall commence to accrue from the date on which the cash is placed to the credit of the Board, or paid by the Land Commission on their account, and shall continue to accrue from day to day on the total amount of the advance out-standing, after allowing for the amount realised on re-sales, until the whole of the advances have been repaid.

Payments to
Land
Commission.

Interest shall be payable to the Land Commission on the first day of June and first day of December in every year.

The payment of sinking fund in respect of land remaining in the hands of the Congested Districts Board for more than five years shall commence to accrue from the first gale day after the fifth anniversary of the advance, or on the fifth anniversary should that be a gale day, and the first half-yearly instalment thereof shall be payable on the next succeeding gale day.

28. For the purpose of ascertaining the amount payable to the Congested Districts Board in respect of estates purchased and re-sold under the Irish Land Act, 1903, at an enhanced price consequent on improvements or otherwise, a separate account shall be kept of each estate purchased by the Congested Districts Board. When parcels of an estate have been sold to an amount corresponding to the amount advanced from the Irish Land Purchase Fund, the further advances in respect of any additional parcels of land on the estate shall be paid to the Congested Districts Board by the Land Commission.

Payments to
Congested
Districts
Board for
Improvements.

Treasury Chambers, Whitehall.

14th April, 1905.

H. W. FORSTER,
BALCARRES.

APPENDIX XXV.

STATEMENT of ACCOUNT for all Estates purchased by Congested Districts Board under Land Acts previous to Act, 1903.

	Amount.
	£
Rents and Interest received to 31st March, 1905, ...	128,428
Receipts for cattle sold, grazing rents and Sale of Timber, Meadows, Turfery, &c., on Lands in hands to 31st March, 1905.	86,080
Cash payments made by tenants for occupation interest in new holdings, or land attached to holdings.	11,629

(D) Retained old Holdings.

APPENDIX XXVII.

SUMMARY of PARTICULARS obtained in respect of 3,847 Agricultural Holdings on the Dillon Estate, showing Rental, Number of Family, Live Stock, &c., when the Board purchased the Estate.

	No.	Amount.
		£ s. d.
No. of Tenants, ...	3,847	—
Rental at time of purchase by Board, ...	—	15,102 11 8
LIVE STOCK ON HOLDINGS—		
Cows, ...	6,529	—
Store Cattle over one Year, ...	3,277	—
Calves under one Year, ...	4,681	—
Sheep, ...	4,029	—
Pigs, ...	3,826	—
Horses, ...	676	—
Jennets or Mules, ...	430	—
Asses, ...	2,230	—
Hens, ...	55,118	—
Ducks, ...	22,603	—
Geese, ...	4,384	—
Turkeys, ...	939	—
Number of Cattle usually sent to Grazing Farms, ...	1,380	—
Annual Amount usually paid for Grazing, ...	—	1,021 4 5
No. of Holdings having Out-Offices, ...	2,772	—
No. of Dwellings in which Cattle were kept, ...	1,635	—
No. of Tenants who were Migratory Labourers, ...	1,096	—
Number of Migratory Labourers in family, exclusive of Tenant, ...	Males, 2,401 Females, 12	— —
Average number of Months usually absent from Home, ...	8-56	—
Number of persons including those absent from Home, ...	23,152	—
NUMBER OF PERSONS AT HOME—		
Sixteen years and not exceeding Sixty-five Years, ...	Males, 6,264 Females, 5,961	— —
Over Sixty-five years, ...	Males, 625 Females, 766	— —
Under Sixteen years, ...	Males, 3,829 Females, 3,774	— —
Number of persons belonging to families of Tenants now in occupation who have Emigrated, ...	Males, 1,843 Females, 2,119	— —
Number of Tenants who acquired their Holdings by Purchase within the past Thirty years, ...	214	—
